Enhance your Audits and Inspections with AI-powered Capabilities

Key AI Features

AI VISION

- ✔ Utilize AI to quickly, easily, and accurately complete audit and inspection questions based on the analysis of photo, video, and document attachments
- ✔ Each AI-generated answer includes a confidence score, ensuring transparency and trust in the results and the data needed to continually improve data accuracy over time

AI INSIGHTS

- ✔ Automatically generate an Executive Summary for a completed audit/inspection
- ✔ Automatically identify and summarize key risks to your business based on the results of completed audits or inspections
- ✔ Instantly flag incomplete audits and inspections and those that likely need to be reviewed
- ✔ Automatically generate recommendations for corrective and preventive actions for an audit or inspection

AI VISION

Automatically analyze photos, videos, and documents to complete inspection questions with precision and confidence

AI INSIGHTS

Extract valuable insights and enhance decision-making effortlessly.

AI ANALYTICS

- ✔ Identify high-priority risks across your business by category, location, activity, and even employee
- ✔ Detect data from your auditors and inspectors that is likely the result of 'pencil whipping'
- ✔ Utilize historical data to predict future trends and outcomes
- ✔ Identify emerging trends and patterns, enabling proactive decision-making and strategic adjustments to stay ahead of the curve
- ✔ Detect deviations that may indicate potential inaccuracies, issues, or and opportunities for data accuracy improvements
- ✔ Benchmark current performance against historical data to help understand relative performance and identify areas for improvement
- ✔ Execute detailed comparisons across different time periods, locations, or units, facilitating a comprehensive evaluation of performance metrics

AI ANALYTICS

Gain enterprise-wide risk summaries, predictive insights, and detect anomalies with ease.
